Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action is in response to Applicant's amendment filed July 7, 2005. Claims 1-35 are pending in the present application.

Election/Restrictions

1. In view of Applicant's argument (see pages 8-10), restriction to one of the following invention is required under 35 U.S.C 121:

A. Claims 1-11 and 32-34 are drawn to a system for routing data by converting the received data into a common format, classified in **class 709, subclass 246**.

B. Claims 12-23 are drawn to a receiving device implementing a data-rendering module for applying logic resulting from execution of the object model to function and display devices, classified in **class 715, subclass 748**.

C. Claims 24-31 are drawn to providing an HTML template and JavaScript library to a client for use in developing query applications that contain data rendering logic, classified in **class 715, subclass 760**.

2. Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility such as a system for routing data by converting the received data into a common format, classified in a *different Class/Subclass*. Invention B has a separate utility such a receiving device implementing a data-

rendering module for applying logic resulting from execution of the object model to function and display devices, classified in a *different Class/Subclass*. Invention C has separate utility such as providing an HTML template and JavaScript library to a client for use in developing query applications that contain data rendering logic, classified in a *different Class/Subclass*. See MPEP 806.05(d).

3. The inventions are distinct, each from the other because of the following reasons:

(a) these inventions have acquired a separate status in the art as shown by their difference classifications.

(b) the search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the two inventions would not be the co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group A search (claims 1-11 and 32-34) would require use of search **class 709, subclass 246** (not required for the inventions B or C).

The Group B search (claims 12-23) would require use of search **class 715, subclass 748** (not required for the inventions A or C).

The Group C search (claims 35-36) would require use of search **class 715, subclass 760** (not required for the inventions A or B).

For the reasons above restriction for examination purposes as indicated is proper.

Art Unit: 2143

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17 (h).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alina N. Boutah whose telephone number is 571-272-3908. The examiner can normally be reached on Monday-Friday (9:00 am - 5:00 pm).
